

Abstract of the Disclosure

A compound having 3-oxo-3, 4-dihydro-2H-1, 4-thiazine 4-tetrahydropyrazine as a main skeleton. The compound is a chymase inhibitor and is represented by the following formula [I] and salts thereof:

In the formula [I], X is S; R¹ and R² are H, alkyl, cycloalkyl or aryl; R³ and R⁴ are H, alkyl, cycloalkyl, aryl or an aromatic heterocycle; R⁵ is H, alkyl, cycloalkyl, aryl or -A₃-A₄-R⁷; R⁶ is H, alkyl, cycloalkyl, hydroxy, alkoxy, aryl, aryloxy or an aromatic heterocycle; R⁷ is H, alkyl, hydroxy, alkoxy, aryl, aryloxy, amino, alkylamino, arylamino, an aromatic heterocycle or a nonaromatic heterocycle; A₁ is alkylene; A₂ is carbonyl or sulfonyl; A₃ is alkylene; A₄ is carbonyl or oxalyl; and n is 0 or 1.
